## SLIME RECIPE FROM THE KITCHEN:

Makes 2 cups

### INGREDIENTS

- 2 (4-ounce) bottles washable school glue, such as Elmer's
- 1 to 2 drops liquid food coloring (optional)
- 1/4 cup glitter (optional)
- 1 teaspoon baking soda
- 2 -3 tablespoons saline solution, divided

### INSTRUCTIONS

1. **Color the glue (optional):** Pour the glue into a medium bowl. Stir in the food coloring and glitter, if desired. This mixture doesn't need to be homogeneous, as you'll mix it even more after adding the baking soda.
2. **Add the baking soda:** Add the baking soda to the glue mixture and stir until smooth.
3. **Add the contact lens solution:** Pour in 2 tablespoons of the contact lens solution and stir slowly. The mixture should begin to harden, becoming stringy.
4. **Mix until a ball forms:** Continue mixing slowly until a ball of slime forms.
5. **Knead by hand:** Pick up the slime and work between your two hands, until smooth. If the slime is particularly slimy, work in another 1/2 tablespoon of contact lens solution as needed.

**PLAYING WITH SLIME!** Once mixed, you can play with the slime immediately or store for future play.

- **Hidden Figures:** Fold small figures or cars into the slime and ask your children to find them.
- **Polka-Dot Slime:** Fold 10 to 15 soft pom-poms into clear slime (no coloring, no glitter)
- **Cut-and-Measure Slime:** Provide your kids with a metal or plastic ruler and kid-safe scissors. See who can stretch their slime the furthest. Or practice counting and cut the slime into 10-inch pieces.

### RECIPE NOTES

- **Storage:** Store in an airtight container at room temperature.

**Sending Love and Hugs to You  
and Your Family! God Bless!**
